A PORTABLE MOBILE PHONE CHARGER DESIGNED FOR COMMERCIAL USE

call systems  
technology

Passionate People. Proven Solutions.

Discgo Charger is the first of its kind; a portable, robust, charging solution made for restaurants, pubs and bars. Discgo charges **phones, tablets and cameras** without being plugged into a wall, giving users the freedom to stay charged and connected on the go.

Offer your customers something new, entice them to stay in your venue longer and add that extra level of customer service and guest experience with Discgo!

## Discgo Facts

- ✔ Discgo can charge **2** devices at once.
- ✔ Charges at **1% per minute**, the same rate as being plugged into a wall!
- ✔ Charges **4 mobile phones from 0-100%** before needing to be returned to the Discgo docking station for charge.
- ✔ Discs take **40 minutes to charge from 0-100%** in the dock.
- ✔ There are **5 discs** per docking station.

## Return on Investment

We know that offering the Discgo Charging facility can increase footfall and customer spend. But with Discgo, **there are other opportunities to consider:**

### SPONSORSHIP

Let your sponsors pay to advertise on the Discgo discs. If your brewery or supplier wants to raise awareness of their brand, this is the perfect place to be seen.

### PROMOTIONS

Engage with your audience by personalising and utilising the space on the Discgo fascia to promote your brand, event or offer. This can be easily changed and updated depending on what promotions you have going on.

### INCREASE IN DWELL TIME

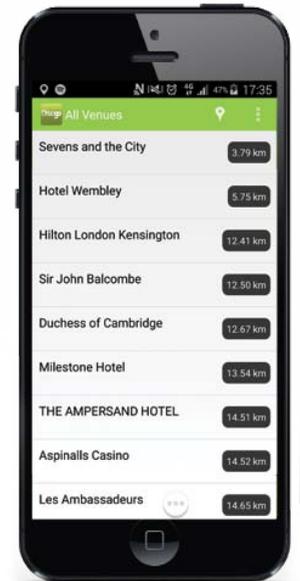

Feedback suggests customers stay for two more drinks while their phone is recharging using Discgo. That means extra revenue and extra profits!

## Discgo Charger App

The Discgo Charger app allows customers to locate the nearest venues that offer the Discgo charging facility. Users can discover all nearby participating venues, they can even search by venue name or different location. When a mobile phone battery drops under 30%, the Discgo app will automatically open suggesting nearby venues where the customer can charge their phone.

Free to download, the app is available on iOS and Android. Make sure your venue is part of the Discgo app so customers can find you!
