## Recipe View Software for Menu Item Presentation

ConnectSmart TeamAssist from QSR Automations<sup>®</sup> is designed to improve efficiency, accuracy and training.

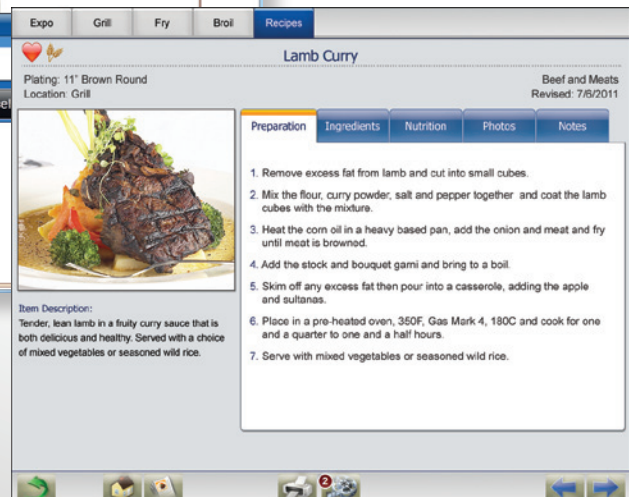

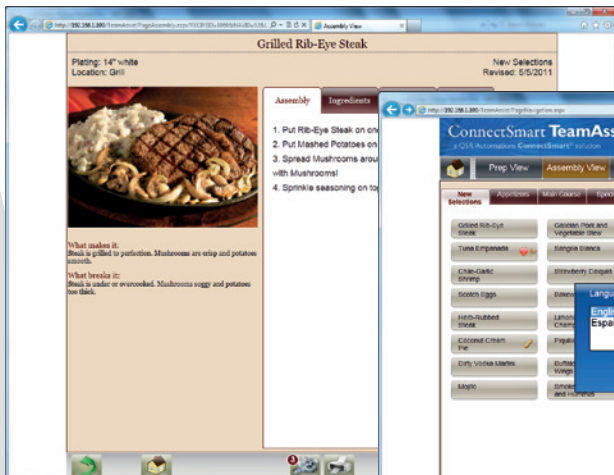

Used standalone or with ConnectSmart Kitchen<sup>®</sup> (CSK), QSR's customisable TeamAssist recipe viewer can be used anywhere in the restaurant, bar, buffet, bakery or grocery store.

*"...cooks can reference **assembly instructions and photos or video** at their command quickly and **without leaving their station**. This increases order accuracy and consistency of presentation."*

*"Using the CSK and TeamAssist ensures that every menu item is completed quickly and accurately."*

- > Create, maintain and present information when, where and how it is needed.
- > **Use stand-alone or with CSK** to automatically present the same menu item in different formats based on the needs of each kitchen station.
- > **Database management** ensures easy set-up, changes and speed, with user notifications for new and changed recipes.
- > Support for multiple photos, videos, languages and themes at each station to **minimise training**.
- > **Save costs** and eliminate printed spec cards and DVDs that cause clutter and are misplaced within the restaurant.
- > Provide nutrition and allergen information, improve accuracy, drive consistency and alleviate stress.

- > **Browser-based** to easily run in-store or at the enterprise level.
